

Don't let the Democrats censor the real resistance

The Democratic Party's shameful and fake posturing as "the resistance" to Trump hit a new low last Friday when their official Twitter account posted an image that included a photoshopped picture of a PSL poster. As we explained in our [official statement](#):

"The official Twitter account of the Democratic Party sent out a Tweet celebrating the defeat of the Republican health plan, including an image of the mass protest movement against Trump. In the bottom of the photo, taken at the Jan. 21 Women's March in D.C., they flagrantly blacked out the text of a PSL poster that read, "Trump is the Symptom. Capitalism is the Disease. Socialism is the Cure." The lines about capitalism and socialism were erased but "Trump is the symptom" was left — which allowed people to quickly identify their falsification."

Thousands of people have expressed their outrage over social media at this blatant act of censorship. It was yet another example of the Democratic Party exploiting the hard work of grassroots activists to further their own agenda.

Major news outlets and journalists quickly picked up on the story.

The Democratic National Committee does not organize protests. They had no picture of a Democratic Party rally to use in their Tweet because these do not exist. But before they could cynically take credit for the resistance's victory they needed to sanitize the photo of what they fear the most -- the socialist movement that is growing throughout this country.
